- Vancis C&MS
- VMware Cloud Provider

# Increasing adoption public cloud

Worldwide Cloud IT Infrastructure Market Forecast by Deployment Type, 2016 - 2022 (shares based on Value)

# What is VMware Cloud Verified?

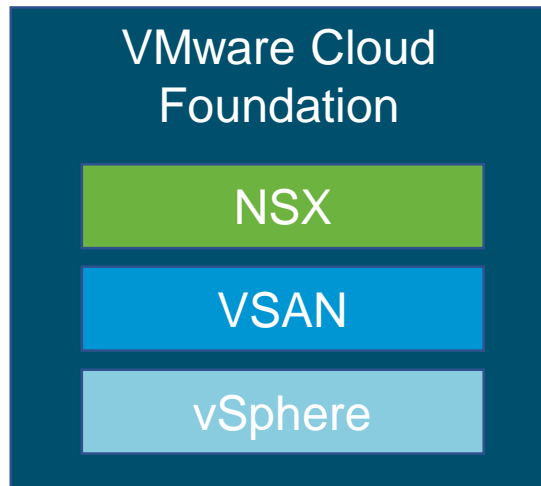

**AS YOU ADEQUATELY PUT**

**THE PROBLEM IS CHOICE**

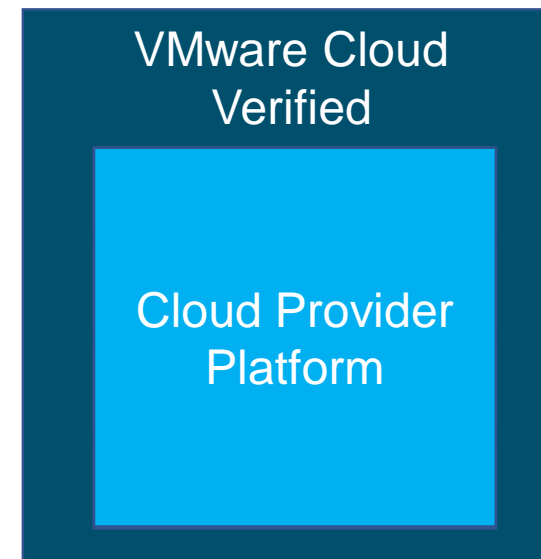

# VMware validated designs

Private Cloud Tenant

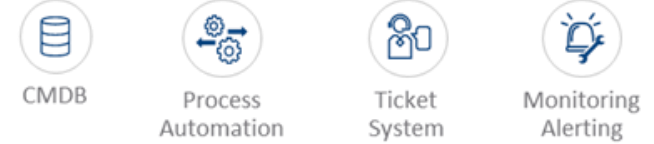

Shared Cloud

Tenant A Tenant B Tenant C

# vCloud Director

## Open

- Comprehensive REST API
- Python SDK
- vCD-CLI for DevOps to develop customized services

API-Driven

## Extensible

- Extensible UI and APIs to create value:
  - Backup as a Service (Provider)
  - Containers-as-a-Service (Tenant)
- Consumable through modern frameworks such as Ansible and Terraform

Beyond IaaS

## Automated

- Allow Provider to automate custom processes like tenant onboarding and maintenance tasks, and integrate with operational tools (Ticketing, CMDB etc.)
- Increase Service Quality proactive alerting and automatic remediation

Operational Efficiency & Service Quality
