VMware Cloud Verified program from a customer perspective

VMware Cloud Verified program from a customer perspective

Rudolf Kleijwegt

Bryan van Eeden

- Infrastructure engineers
- vcloudvision.com
- Vancis C&MS
- VMware Cloud Provider

Increasing adoption public cloud

Worldwide Cloud IT Infrastructure Market Forecast by Deployment Type, 2016 - 2022 (shares based on Value)

What is VMware Cloud Verified?

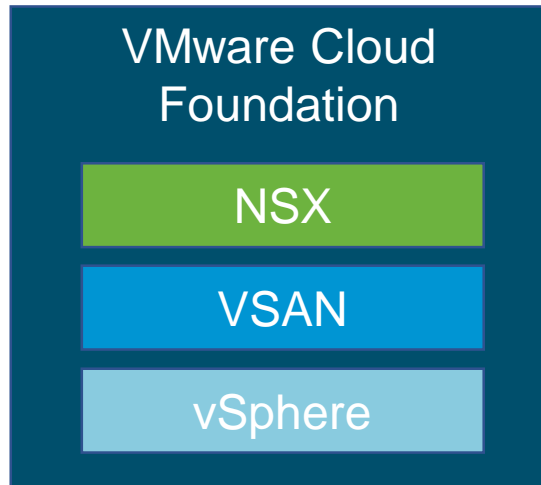

AS YOU ADEQUATELY PUT

THE PROBLEM IS CHOICE

VMware validated designs

Private Cloud Tenant

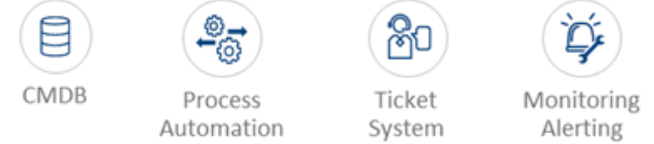

Shared Cloud

Tenant A Tenant B Tenant C

vCloud Director

Open

- Comprehensive REST API
- Python SDK
- vCD-CLI for DevOps to develop customized services

API-Driven

Extensible

- Extensible UI and APIs to create value:
 - Backup as a Service (Provider)
 - Containers-as-a-Service (Tenant)
- Consumable through modern frameworks such as Ansible and Terraform

Beyond IaaS

Automated

- Allow Provider to automate custom processes like tenant onboarding and maintenance tasks, and integrate with operational tools (Ticketing, CMDB etc.)
- Increase Service Quality proactive alerting and automatic remediation

Operational Efficiency & Service Quality
